

zedIT Solutions Announces Sponsorship at the 2017 NATI Knowledge Summit

Continuing to support the growth of the province's key associations within the IT industry.

St. John's, NL – April 18th, 2017 - zedIT Solutions (www.zedIT.com) is once again a proud sponsor of the NATI Knowledge Summit, taking place Wednesday, May 10th at the Sheraton Hotel St. John's. The summit is an excellent opportunity for key players in Newfoundland and Labrador's IT community to come together to network, discuss and share ideas with each other and industry experts.

Why we Support the Summit:

zedIT has its roots in Newfoundland and Labrador while being successful on a global scale. With offices spanning from San Francisco, USA to London, UK, we continue to grow while keeping our headquarters and most of our Senior executive team local. Our team works hard to not only maximize the impact of technology in our clients' organizations to achieve their full potential, but to also help strengthen the overall technology community here in NL. We believe this aligns with NATI's mission and reason for delivering events and activities such as the Knowledge Summit.

"Our commitment to the local tech community and NATI runs deep. As an active NATI member and contributing sponsor for over two decades, we are delighted to announce our continued support of the annual summit," states Gerard Duggan, Vice President of zedIT Solutions. "The overall growth and individual successes we've seen in the local technology sector over the past decade has been encouraging and we believe that there is unlimited room to grow. A clear vision, strategy and governance, driven by NATI, in tandem with effective Public Sector policy, will accelerate this growth while at the same time ensuring businesses in more traditional industries are supported with enhanced opportunities to be innovative and competitive."

About zedIT Solutions:

zedIT Solutions Inc., a Group zed company (www.gzed.com), has been providing both Strategy and Execution for Large Enterprise clients for more than twenty-five years. By combining world-class expertise and delivery experience with a flexible and pragmatic approach, zedIT delivers on the promise of technology and helps each customer use technology in the realization of impactful solutions that meet desired business objectives.

The team is comprised of experienced, results-focused experts that understand how business and technology align to produce tangible results. zedIT is known for its relentless focus on quality execution and continuous improvement. They work in partnership with customers in the Public and Private sectors who are adopting rapidly evolving digital technologies in their operations and in the delivery of services to their constituents and customers.
